Erik Wiberg, P.E. (R.W. Gillespie & Associates)

September 22, 2011

Dear Friend:

Mark Your Calendars - We just confirmed that the Maine Engineers Week **2012 Banquet and EXPO will be held March 2 & 3 at the University of Maine in Orono**. With your help, we held a successful Engineering EXPO at the University of Southern Maine in February 2011, reaching approximately 1,200 people with hands-on demonstrations, exhibits, and events provided by our sponsors and partners.

2011 PRESENTING SPONSOR

2011 GOLD SPONSOR

2011 SILVER SPONSORS

We hope that we can count on your support in 2012. This may be the year that attendance exceeds 1,500 people - students, parents, and the general public! Maine Engineers Week provides an outstanding opportunity to gain positive exposure for your organization while inspiring the next generation of engineers and raising awareness about the vital role that engineering plays in our economy.

New for 2012 – MEPC has been working on a new website, materials, and is now engaged in social media to better promote engineering, Maine Engineers Week 2012, and your sponsorship! With social media, we'll keep you updated through Facebook and LinkedIn and now we'll be able to be more interactive with middle and high school students interested in engineering. We are also excited to team up with the YMCA State Swim Meet to publicize Maine Engineers Week 2012 - and your support - to over a thousand swim families who are coming to the University of Maine Field House the same day.

The banquet, the EXPO, souvenir T-shirts, and the outreach that precedes Maine Engineers Week require support from companies like yours to keep this effort going. Please know that **your contribution directly helps thousands of kids realize – some for the first time – what engineering is.** This is the spark that ignites their curiosity and creativity to become future engineers and your company's top employees that will drive Maine's economy forward.

Join us to raise the bar and help make more kids aspire to be engineers. On the next page, several sponsorship levels are available to best suit your company's needs and mission. Please remember the tremendous opportunity that Maine Engineers Week gives Maine kids to experience the thrill and wonder of engineering.

A MEPC Board member will be calling in a few weeks to follow up on this mailing. Any contribution you make is appreciated. If you have any questions please feel free to contact me.

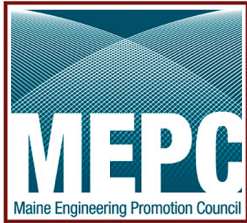

Sincerely,

Mark Bergeron, P.E., President
